

PVT systems	IEA SHC Task 60	News 18
<i>Full Title</i>	Application of PVT collectors and new solutions in HVAC systems	
<i>Date</i>	February 24th, 2018	

Pre-invitation to meeting 1

**May 16-17-18, 2018
Freiburg, Germany**

1. Workshop

Dear all participants in IEA SHC Task 60 about PVT systems, Fraunhofer ISE will invite us to Freiburg in a separate invitation.

On May 16th :

Workshop on the status of PVT collectors and systems

As promised in our workplan, there will be a one day workshop with local industry participation where it would be good if you present your work too. Please prepare a contribution. This will also save time for our meeting sessions since presentation of projects would certainly have been made during this 1st day.

The meeting is organized by :

Manuel Lämmle (manuel.laemmle@ise.fraunhofer.de, [+49 761 4588 5744](tel:+4976145885744))

2. Task 60 news

There has been a change in the Task structure. Newly created Subtask C with a lead from Gord, has been removed since unilaterally Qatar decided suddenly to withdraw even from SHC apparently.

I have updated again all documents and they will be distributed as soon as the designated review committee accepts them.

I am sorry for that but I could not do anything about it.

I will ask for an update of the web site soon.

We have interest from some other countries and I hope it will turn to be some

more participation.

3. Task meeting May 17-18

For our Task 60 meeting, the preliminary agenda will come soon and info on hôtels together with the workshop organisation.

Please organize your journey.

4. IEA News

Publications and other news from the IEA, including their Insight Series 2018 on “renewable heat policies”:
